## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2 there is recited no means for performing the recited functions of receiving a package and opening the package.

### ***Specification***

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because of the presence of legal phraseology, such as "means". Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 102***

Art Unit: 1761

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5, 6, 13-15 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by MacCorkell.

There is disclosed in MacCorkell a beverage brewing and dispensing device comprising: first and second support members 61, 62 pivotally connected together at a support pivot axis to form an extraction cavity; a liquid intake 66 associated with the extraction cavity; a fluid exit 68 associated with the extraction cavity; a linkage operatively associated with the support members, the linkage comprising an operation leverage 69 connected to the second support 61 at a pivot axis and a traction arm (not labeled) pivotally connected to the first support member 62 at a traction pivot axis, the traction arm being connected to the operation lever at a connection pivot axis; and wherein the operation lever is disposed on the same side of the support pivot axis as the extraction cavity.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over MacCorkell in view of Fond et al. '472.

Fond discloses that it is known in the art to provide package opening means 11 and 40 at the liquid intake and fluid exit.

It would have been obvious to one skilled in the art to provide the device of MacCorkell with the package opening means taught by Fond, in order to thoroughly mix the liquid with the beverage substance.

***Allowable Subject Matter***

Claims 19 and 20 are allowed.

Claims 3, 4, 7-12 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Reginald L. Alexander whose telephone number is 703-308-1594. The examiner can normally be reached on Monday-Friday.
